

ISAAC BANSON BOTWE

SOFTWARE ENGINEER

PROFILE

Software Engineer with over six years of experience designing, building and supporting enterprise web systems for higher-education institutions. Strong background in PHP and MySQL application development, learning management systems, database design and administration, and third-party system integration. Currently responsible for the delivery and support of core academic and administrative platforms at KAAF University, having previously led the LeMAS and Systems Support team at Accra Institute of Technology. Comfortable owning a system end to end — requirements gathering, architecture, development, deployment, user training and ongoing support.

WORK EXPERIENCE

KAAF UNIVERSITY | Gomoa Fetteh Kakraba, Ghana

Software Engineer

July 2025 – Present

- Design, develop and maintain university applications including student portals, learning management systems and research tools.
- Integrate third-party platforms — LMS solutions such as Moodle and Canvas, and ERP systems such as PeopleSoft and Banner — with internal university systems.
- Design and manage databases, ensuring data integrity, efficient access, and reliable backup and recovery procedures.
- Provide technical support and debugging for faculty, students and administrators, translating technical issues into clear language for non-technical users.
- Support institutional data analytics and reporting to inform management decision-making.
- Collaborate with IT teams, system administrators and stakeholders on infrastructure and policy, and maintain compatibility across university platforms.
- Work with faculty members and researchers to build custom research software and assist in embedding technology into teaching and research.

ACCRA INSTITUTE OF TECHNOLOGY (AIT) | Accra, Ghana

Senior Software Developer

April 2023 – June 2025

Team Leader, LeMAS & Systems Support (March 2025 – June 2025)

- Promoted to Team Leader for LeMAS and Systems Support in March 2025 in recognition of technical performance and leadership, with an additional responsibility allowance awarded by management.
- Led the development, implementation and ongoing support of the institution's Learning Management System serving students, lecturers and administrators.
- Installed, customised, updated and maintained AIT internal and external websites and web systems.
- Designed and optimised databases for improved performance and scalability in line with institutional objectives.
- Led, mentored and managed the software team; conducted code reviews and coached junior developers, raising overall delivery quality.
- Developed reusable software tools and subsystems to support code reuse and speed up new development.
- Produced creative visuals and managed the planning and rollout of web-based applications.

EDUCATION

2022 - 2023

TAKORADI TECHNICAL UNIVERSITY

- BACHELOR OF TECHNOLOGY IN INFORMATION TECHNOLOGY (SOFTWARE ENGINEERING)

2019 - 2022

TAKORADI TECHNICAL UNIVERSITY

- HND IN INFORMATION TECHNOLOGY

SKILLS

- **Languages:** PHP, Java, JavaScript, SQL, HTML5, CSS3
- **Frameworks:** Laravel, CodeIgniter, Bootstrap 5, jQuery, AJAX, DataTables, Composer
- **Databases:** MySQL, MariaDB, PostgreSQL, MS SQL Server, MongoDB, SQLite
- **Systems:** LMS (Moodle, Canvas), student portals, ERP integration, WordPress / CMS, REST APIs, payment gateways
- **Infrastructure:** Linux & Windows servers, cPanel hosting, domains & DNS, LAN/WAN, CCTV & IP devices
- **Tools:** Git, code review, Agile, Asana, Trello, OOP, SEO
- **Design & Other:** UI/UX design, Photoshop, Adobe XD, AI integration & digital marketing

PROJECTS

- **Learning Management System (AIT)** – PHP/MySQL platform supporting course delivery, assignments, quizzes, examinations and results for students and lecturers; led development and support.
- **University Web Presence & Student Portals** – design, deployment and maintenance of institutional websites and student-facing portals, including SEO and performance optimisation.

INB IT FIRM – personal projects built in my own time

- **INB School Management System** – modular school administration platform built independently, covering admissions, attendance (QR-code scanning), fee management with payment integration, examinations, role-based access and reporting dashboards.
- **Business and community web systems** – custom platforms and websites developed as personal projects, including marketplace, delivery, savings (susu) and church management modules.
- **Infrastructure practice** – hands-on networking, CCTV/IP device configuration, hosting, domain and email administration, keeping infrastructure skills current alongside development work.

CORE STRENGTHS

- Project Management
- Team Leadership & Mentoring
- Problem Solving
- Teamwork
- User Training & Support

LANGUAGES

- English (Fluent)
- Fante (Native)
- Twi (Fluent)

- Increased AIT's online visibility through search engine optimisation and content improvements.

MARY'S CHILD EDUCATIONAL COMPLEX | Ghana

IT Teacher (Class 4 – JHS 3)

Aug 2022 – April 2023

- Taught Information and Communication Technology to pupils from Class 4 through Junior High School 3, covering computer fundamentals, word processing, spreadsheets, presentations, internet use and online safety.
- Prepared schemes of work, lesson notes and practical exercises aligned to the national ICT curriculum, and set and marked termly examinations.
- Ran practical computer laboratory sessions, supervising pupils on hands-on tasks and managing lab discipline and equipment usage.
- Maintained the school's computers, printers, projectors and network, handling installation, troubleshooting, virus removal and routine servicing.
- Prepared JHS 3 candidates for their BECE ICT paper and supported staff with day-to-day computer and record-keeping needs.

TAKORADI TECHNICAL UNIVERSITY | Takoradi, Ghana

Teaching Assistant & Systems Support

2021 – 2022

- Assisted in the design, development and implementation of database structures and schemas, and monitored backup and recovery procedures.
- Ensured the integrity, security and accessibility of departmental database systems, and troubleshoot performance issues.
- Organised and supervised laboratory sessions, experiments and practical exercises.
- Collaborated with senior lecturers to prepare course materials and to embed database concepts into practical coursework.
- Conducted tutorials and discussion sessions supplementing main lectures, and facilitated class participation.

FEKWON COLLEGE | Takoradi, Ghana

IT Instructor & Support Technician

2017 – 2021

- Delivered practical IT instruction in computer fundamentals, office applications, web design basics and hardware maintenance.
- Installed, configured and maintained laboratory computers, software, printers and network equipment, keeping downtime to a minimum.
- Set up and administered the college network, including cabling, router and switch configuration, internet access and user accounts.
- Performed hardware diagnostics, repairs, upgrades and data recovery for college equipment and staff machines.
- Modified and extended existing software systems to improve performance and add features requested by staff.
- Conducted needs assessments for departments, prepared cost estimates and advised management on equipment purchases and system upgrades.
- Managed multiple concurrent projects and tasks under deadline pressure, and provided user training and ongoing technical support to staff and students.
